Subject: Re: Update on Analysis for TES Study (MDSPS #AA01879), December 2, 2002

Sensitivity: Confidential

Chad,

We just finish our weekly conference call with Covance and Philip Morris regarding the Total Exposure Study (AA01879). Jill mentioned that her number received for 3-HPMA were not the same as yours. She has 232. She will be getting a hold of you to discuss.

Thanks
Kim

Philip Morris Team,

Here are the sample receipt numbers for MDSPS Lincoln Bioanalytical as of December 2, 2002 for the total exposure study. Due to the load of other Phillip Morris Sample analyses in January we will delay sample analysis until Spring. We have not yet fully inventoried samples received on November 15 for Butadiene Metabolites and November 22 for TAC and 1-OHP. Because the analysis will not start for several months they receive a lower priority in our sample management group.

| Group # | Drug | # received | # back-ups | # assayed |
|---------|-----------------------|------------|------------|-----------|
| 1 | NNAL Total | 202 | 0 | 0 |
| 2 | NNAL Free | 202 | 0 | 0 |
| 3 | 3-HPMA | 280 | 277 | 0 |
| 4 | Cancelled | NA | NA | NA |
| 5 | Total Anti-oxidant | 113 | 0 | 0 |
| 6 | 1-OHP | 106 | 0 | 0 |
| 7 | 1,3 Butadiene Metabs. | 78 | 78 | 0 |

(-----+-----+-----+-----+-----|

Let me know if there are any questions with the above information.

Regards,

Chad
